Volume 28 Contents

January

Editorial 1
Recommendations of the Committee on Education of the International Union of Biochemistry and Molecular Biology. Standards for the Ph.D. Degree in the Molecular Biosciences. F Vella, L de Meis, A H Mehler, W Rombauts, H B White III, E J Wood 2
Calculating apparent equilibrium constants of enzyme-catalyzed reactions at pH 7. R A Alberty 12
Optimization of energy coupling: what is all the argument about? K L Manchester 18
The making of a model of *Escherichia coli*, magnified two million times — the 'Millennium Bug'. H T Tribe 20
Understanding ion transport by quantification of mitochondrial swelling. M. Königsberg 24
Classifying amino acids as gluco(glyco)genic, ketogenic, or both. G D'Andrea 27
Features Section
Problem-based learning. C A Smith 29
Problem-based learning in veterinary medicine: protein metabolism. V A Rivarola, M B García 30
Computer-based learning. G R Parslow 32
Miscellaneous Bytes 33
CD-ROM review 34
Biotechnology education. R O Jenkins 35
Development of biotechnology education in Turkey. F Severcan, A Ozan, P I Haris 36
Experimental Section
Plant protoplast isolation — a practical approach. V Prasad, G R Naik 39
Chemical cross-linking analysis of Ca^{2+}-ATPase from rabbit skeletal muscle. B E Murray, K Ohlendieck 41
A simple and rapid method for screening amylolytic bacteria. P C Effio, E F Silva, M T Pueyo 47
Investigating plant lipid biopolymers. A Heredia, A Matas, E Dominguez 50
Does succinate oxidation yield $FADH_2$ or ubiquinol? S Brown 52
Letters to the editor 55
Book Reviews 57
Monitors 62

March

Editorial 63
The integrative nature of biochemistry: challenges of biochemical education in the USA. P C Huang 64
Journal club as a supplement to the undergraduate biochemistry laboratory. M L Hall, A J Wolfson 71
Strategies for building criticism skills in undergraduate biochemists. G Denyer 74
How do proteins fold? C A Smith 76
Does the transport of oxaloacetate across the inner mitochondrial membrane during gluconeogenesis require carrier proteins other than those used in the malate–aspartate shuttle? Ivan G Darvey 80
Features section
Computer-based learning. G R Parslow 83
Product review. G Parslow 84
Biotechnology education 85
Integration of post-graduate studies with corporately funded biotechnology programs. Jennellc Kyd 86
A suggested module detailing biopharmaceuticals suitable for inclusion in undergraduate applied biochemistry/biochemistry programs. G Walsh 89
Interrelationship between oxidative damage and antioxidant enzyme activities: an easy and rapid experimental approach. J M Matés, J C Aledo, C Pérez-Gómez, A Esteban del Valle, J M Segura 93
Experimental treatment of the laws of heterogeneous catalysis with immobilized yeast cells (*Saccharomyces cerevisiae*). P Grunwald 96
A guided experimental approach to practical molecular pharmacology teaching: demonstration of sequence selectivity of DNA-binding drugs by arrested polymerase chain reaction. R Gambari 100
The excellence of turnip mitochondrial fractions. J A F Vicente, V M C Madeira 104
A single protein research integrated advanced biochemistry laboratory course; spectroscopic determination of tyrosyl side chain pKa. B N Blanchette, B R Singh 107
An experiment on apoptosis induced by polyamine adducts produced in the presence of serum amine oxidase. I Fajardo, J L Urdiales, F Sanchez Jiménez, M Á Medina 110

PII: S1470-8175(01)00007-8

Letters to the Editor 113
Book Reviews 115

Editorial 123
Editorial 124
Guide for authors 125
Computer applications in biomolecular sciences. Part 2: bioinformatics and genome projects. C E Sansom, C A Smith 127
Research training between 14 and 18 in Hungary. P Csermely, G Halász, G Jeney, J Máthé, L Mikló, D Solymári, Á Szekeres, G Tamás 132
Association of biochemistry grades with performance in pharmacology and anatomy in a Saudi Arabian medical college. A Hamdi, A Assiri, S A Suleiman 134
Peroxisomes: biochemistry, molecular biology and genetic diseases— a video programme for teaching students. N Latruffe, S J Hassell 136
Conference 139
Conference Report 141
Features Section
Problem-based learning. C Smith 143
Enzyme kinetics: partial and complete uncompetitive inhibition. C G Whiteley 144
The simulated purification of an enzyme as a 'dry' practical within an introductory course of biochemistry. J C Cameselle, A Cabezas, J Canales, M J Costas, Á Faraldo, A Fernández,. R M Pinto, J M Ribeiro 148
Problem-oriented small-group discussion in the teaching of biochemistry laboratory practicals. N Das, S Sinha 154
Computer-based learning. G R Parslow 156
CD-ROM reviews. G R Parslow 157
Biotechnology Education. R O Jenkins 160
α-Amylase production by solid state fermentation: a new practical approach to biotechnology courses. V H Mulimani, G N Patil, Ramalingam 161
β-Galactosidase immobilization for milk lactose hydrolysis: a simple experimental and modelling study of batch and continuous reactors. J M Obón, M R Castellar, J L Iborra, A Manjón 164
A simple protocol to evaluate nitrogen utilisation in *Saccharomyces cerevisiae*. C A Stella, D A Sáenz, M S Chianelli, S Kaminszczik 169
Carboxyfluorescein fluorescence experiments. S Massou, R Albigot, M Prats 171
Oxidation of cholinesterase-inhibiting pesticides: a simple experiment to illustrate the role of bioactivation in the toxicity of chemicals. M I Arufe, J L Romero, J J Gamero, M J Moreno 174
A practical approach to the choice of a suitable detergent and optimal conditions for solubilizing a membrane protein. H de Lima Santos, P Ciancaglini 178
Letter to the editor 183

July

Editorial
Our journal has a new name and scope. J.G. Voet 185
Articles
The Archaea — a biochemical perspective. C. Bullock 186
Oxygen affinity and capacity in methaemoglobinaemia. P.E.B. Reilly, D.J. Winzor 192
Information retrieval in biochemistry: some exercises to develop a fundamental skill. S. Brown 194
Laboratory Exercises
A strategy for introducing undergraduate students to protein structure. G.O. Noriega, E.S. Vazquez 200
Chromatofocusing. T. Makovec 203
Demonstration of the principles of enzyme-catalysed reactions using alkaline phosphatase. N.C. Price, B.L. Newman 207

Features
Problem based learning.
Editorial: Experimenting with problem-based learning. H.B. White 211
Multimedia in BMB Education
Editorial: Knowledge at a price. G.R. Parslow 212
CD-ROM review: Aspects of Protein Structure 1. The role of individual Amino Acids in Structure and Function. G. Parslow 213
Websites of Note 214
Colicross — a teaching programme simulating the action of bacterial operons. A.G. Clark 216
Biotechnology Education
Editorial: On the merits of viable-cell immobilization in biotechnology education. R.O. Jenkins 221
PCR as a specific, sensitive and simple method suitable for diagnostics. M.G. Claros, A.R. Quesada 223
Book Reviews
Crystallography made clear: A Guide for Users of Macromolecular Models (2nd edn). Patrick J. Loll 227
Genes and the Environment, R.H. Burdon, reviewed by J.E. Lydon 228
Biochemistry Explained: A Practical Guide to Learning Biochemistry, T. Millar, reviewed by E.J. Wood 229
Bacteria in Biology, Biotechnology and Medicine (5th edn), P. Singleton, reviewed by R.O. Jenkins 229
Monitor
The International Union of Biochemistry and Molecular Biology 231
Conference 234

September

Editorial
Can both biochemistry and molecular biology be included in one undergraduate degree program?. J.G. Voet 239
Discussion
Quaternary structure as defined by whom? B. Mbewe 240
Articles
Increasing student involvement in lectures by error-prone talks. L. Tomaska 242
Poly-L-glutamic acid and poly-L-lysine: model substances for studying secondary structures of proteins. T. Makovec 244
A simple setup to illustrate metabolic pathway dynamics. N.S. Punekar 248
Capillary electrophoresis: theory, teaching approach and separation of oligosaccharides using indirect UV detection. B. Lagane, M. Treilhou, F. Couderc 251
Laboratory Exercises
A simple method for immunodetection of membrane-associated proteins. K.R.P. Daghastanli, R.B. Ferreira, G. Thedei Jr., P. Ciancaglini 256
Evaluation of the applicability of two different immunoassays for the detection of wheat gluten in baby foods. C. Avila, A.R. Quesada 261
Features
Problem based learning
Editorial: Case method and problem based learning. H.B. White 265
A case for college molecular biology classes: a right to her genes. S. Gal, J.W. Klein 267
Biotechnology Education
Editorial. Meeting the demand for bioinformaticians 272
PCR primer design: an inquiry-based introduction to bioinformatics on the World Wide Web. T.D. Kim 274
Multimedia in BMB Education
Editorial: University consortia and the emergence of e-universities. G. Parslow 277
Websites of note 278
Lucenz — programmes for undergraduate analysis of enzyme kinetic data 282
Book Reviews
Lehninger's principles of biochemistry (3rd Edn)., D.L. Nelson and M.M. Cox 286
How to Win as a final-year student. Essays, exams and employment by Phil Race 287

A passion for DNA Genes, Genomer, and Society by J.D. Watson 288
Principles and Techniques of Practical Biochemistry by Keith Wilson and John Walker 289
Monitor
Announcement 290
Instructions to Authors I

November

Editorial
Experimental biology 2001 meeting will be great for biochemistry and molecular biology educators. J.G. Voet L 291
Discussion
The new biochemistry: blending the traditional with the other.R. Boyer 292
Articles
Bio-molecular modelling utilising RasMol and PDB resources: a tutorial with HEW lysozyme. J.T. Pembroke 297
Biological energy-coupling in terms of irreversible thermodynamics. J.L. Howland, M. Needleman 301
Understanding initial velocity after the derivatives of progress curves. E. Claro 304
Laboratory Exercises
Glucocorticoid-induced apoptosis: a simple set of laboratory experiments. G. P. Vicent, G.M. Lanuza, D.G. Romero, L. Di Croce, A. Pecci 307
A simple laboratory exercise illustrating active transport in yeast cells. B.U. Stambuk 313
Studying ion channels in undergraduate laboratories. A. Garrill 318
A laboratory experiment demonstrating the dynamic character of membranes. M.E. Pugh, E. Schultz 322
Protein measurement at practical classes for students of pharmacy: a student-centered approach. M.C. Jacques-Silva, J.B.T. Rocha 327
Features
Problem based learning
Editorial: Why teach enzyme kinetics? H.B. White. 330
The kinetic properties of liver glucokinase and its function in glucose physiology as a model for the comprehensive study of enzymes' kinetic parameters and reversible inhibitors. D.M. Bustos, A.A. Iglesias 332
Biotechnology Education
Editorial: Debating the biotechnology issues of the day. R.O. Jenkins 338
Multimedia in BMB Education
Editorial: The web as a dehumanizing force. G.R. Parslow 340
Websites of note 341
The development of virtual lectures to aid in the teaching of medical biochemistry. M. Balfour, C.-b. Chan, M. Heur, R. Rolf, T. Tseng, M.A. Lieberman 343
Book Reviews
Immunology, a short course by E. Benjamini, R. Coico and G. Sunshine. Edited by F. Vella 345
Clinical biochemistry by R. Luxton. Edited by J. Candish 345
Biochemistry by A.C. Brownie and J.C. Kernohan. Edited by F. Vella 346
Proteome research: two-dimensional gel electrophoresis and identification methods by T. Rabilloud. Edited by E.J. Wood 346
